

COMPANY OVERVIEW

The resources and leadership to bring you a world of solutions.

Who we are

For nearly 30 years, Trend Control Systems has offered reliable, easy-to-use products that support the life of your building and reduce life-cycle costs. Trend systems feature a wide variety of solutions for your unique building. The IQ product line offers unmatched range, reach and innovation. Trend Technology Centers (TTCs) install thousands of our solutions every year in construction and retrofit projects of every size and purpose.

You'll find us in high-rise buildings, large commercial and industrial facilities, schools, hospitals and airports. Trend systems also easily integrate into other building systems, including lighting, fire and security/access.

Our solutions use a variety of communication protocols that enable you to cost-effectively build and expand the system that works best for you. Your TTC can engineer unique Trend systems offerings to meet the needs of your intelligent building at any phase—from design to construction to occupancy.

Established 1980

Leadership Todd Cowles, Americas Sales Director

Trend has more than 250 employees worldwide and is backed by Honeywell, a \$38B diversified technology and manufacturing leader.

Distribution channel Trend Technology Centers (TTCs) supply products to end users in more than 50 countries. These value-added resellers (VARs) must pass a stringent review process to be a part of this specialized distribution channel.

Trend provides its TTCs with advanced engineering and commissioning tools, plus comprehensive technical support, enabling them to produce customized control solutions for their customers.

Products Trend has a 27-year commitment to backward compatibility; our latest products are compatible with the very first Trend products launched in 1982.

Memberships BACnet International, CABA; leadership representation in ASHRAE, IEEE, NFPA, APPA, ASHE, CSI, US Green Building Council

Our business Dedicated to rock-solid solutions and backward compatibility to leverage existing investments, Trend provides innovative yet easy-to-use products that keep your building running strong. Our open protocol-based solutions address every facet of automated building controls and are delivered by specialist controls companies that meet defined high standards of workmanship, contract management, documentation and quality control.
