

WHAT CUSTOMERS SAY

...about our products, TTCs and service

Our Trend IQ controls system has provided tremendous savings due to reduced maintenance costs and more accurate control.

Dan Jones, Chief Building Engineer
101 North Tower

The biggest difference now is the flexibility and access we have—really seeing more of what’s going on. It’s not just the quantity of the information, it’s the quality of it, too.

Mark Tumlinson, Operations Manager
Standard Sales, parent company of Anheuser-Busch Distributing

The initial training PAC provided and the ability to go into the system to manipulate the settings makes the Trend system very easy to use. I consider the highlight of this project to be our ability to easily network new buildings and remotely view and adjust the system from a central location.

Kandee Harrell-Bennett, Senior Property Manager
American Asset Corporation, owners of Brier Creek Corporate Center

It’s as easy as the click of a button and I’m able to control the whole building in terms of temperature and making it comfortable for the people on site.

Herman Hussman, Facilities Director
Gems Sensors, Inc.

Has the money we invested improved the situation? I don’t think there’s one soul here who would say it has not.

David Mallory, Senior Minister
Hillyer Memorial Christian Church

Trend is a competitive, user-friendly system installed by a knowledgeable and professional company. When this system goes out of its life, we’ll buy another Trend system.

Bob Hanna, Director of Operations
North Point Towers

This solution has proven to be very efficient, simple and easy to monitor. We will recommend its installation in our next new school.

Dick Leshner, Superintendent
Toltec Elementary District
